Amendments to the Specification

Please amend the paragraph at page 37, lines 13-21 in the following manner:

The computer system 400 includes a PC card control apparatus 411 and a chipset 412. Structures of the computer system 400 shown in FIG. 13 are similar to those of the computer system 100 shown in FIG. 2, except for a USB hub ~~458~~ 480. The USB hub 480 replaces the analog switch 140 embedded in the PC card control apparatus 111 in FIG. 2 and performs a same operation as the analog switch 140. Since the USB hub 480 is easily purchasable, the PC card control apparatus 411 may be made at low cost.
